EDUCATION

University of California, Davis , Ph.D. Electrical and Computer Engineering, Advisor: Junshan Zhang	Sep. 2022 - Present Davis, CA
Zhejiang University , Bachelor Control Science, Advisor: Qinyuan Ren	Sep. 2018 - Jun. 2022 Hangzhou, China

RESEARCH INTERESTS

Robot Learning; World Model; Reinforcement Learning

SELECTED PUBLICATIONS

- **Vita: Vision-to-Action Flow Matching Policy** (*ICLR 2026*) → ★ **130+** stars
D Gao, B Zhao, A Lee, I Chuang, **H Zhou**, H Wang, Z Zhao, J Zhang, I Soltani
- **IN-RIL: Interleaved Reinforcement And Imitation Learning for Policy Fine-Tuning** (*preprint*)
D Gao, H Wang, **H Zhou**, N Ammar, S Mishra, A Moradipari, I Soltani, J Zhang
- **CarDreamer: Open-Source Learning Platform for World-Model-Based Autonomous Driving** (*IEEE Internet of Things Journal*) → ★ **360+** stars
D Gao*, S Cai*, **H Zhou***, H Wang*, I Soltani, J Zhang
- **EI-Drive: A Platform for Cooperative Perception With Realistic Communication Models** (*IEEE Internet of Things Journal*)
H Zhou, E Xie, W Shao, D Gao, M Dong, J Zhang
- **Personalized RewardBench: Evaluating Reward Models with Human Aligned Personalization** (*COLM 2026*)
Q Ma, D Gao, R Cai, B Zhao, **H Zhou**, J Zhang, Z Zhao

RESEARCH PROJECTS

Embodied Multi-Agent System with Coordination	Mar. 2026 - Present
• Building hierarchical robotic VLA system to cover the high-level reasoning and low-level control in challenging embodied multi-agent tasks to achieve effective coordination. • Designing a benchmark with various of long-horizon multi-agent tasks in kitchen to better demonstrate the efficiency and coordination brought by our hierarchical system. • Conducting real-world multi-agent robot experiments, including teleoperation, training, and evaluation.	
Tactile-Aware World Action Model	Apr. 2026 - Present
• Integrating force-field tactile signal and RGB image as multi-modal inputs to provides advantage in contact-rich manipulation tasks. We design a light-weighted but strong joint generation World Action Model framework is adopted to enhance the understanding of future states. • Conducting real-world experiments on robot with tactile force field sensor and RGB camera to further demonstrate its leading performance in a series of contact-rich tasks, such as internet cable plugging.	

WORK EXPERIENCE

Tactile-Aware World Action Model for Robot	Mar. 2026 - Present
Research Intern @ Analog Device	Advisor: Brendan Lynch

SKILLS

Real-World Robots:	ALOHA, Franka Research 3, Flevix, Unitree G1, Tesollo DG-5F
Programming:	Python, C, C++, MATLAB, HTML, Markdown, C#, JavaScript
Machine Learning:	JAX, PyTorch, TensorFlow, Scikit-learn, Pandas, OpenCV, Huggingface
Tools:	Open3D, YOLO, Wandb, Matplotlib, Git, ROS, Linux, Conda
